FINANCIAL AND COMMERCIAL.

SATURDAY, June 8. The only activity in the London market to-day was in the American department and except for the strength in our stocks there was no strong feature, consols indeed declining fractionally to a new low record for the year. The opening of the local market was generally at advanced quotations as compared with last night's close, Union and Southern Pacific being promipent on account of the character of the news from Washington which led a great many people in the Street to believe that the Administration would not pursue as aggressive a policy in the matter of bringing Mr. Harriman into the courts on charges arising out of the revelations made at the Interstate Commerce Commission's inquiry last winter as it had been credited with entertaining. These stocks continued prominent in the trading all day and closed at substantially higher prices, although at some recession from the highest recorded during the session. The Hill issues, the hard coalers and Pennsylvania were also strong and active and there was hardly a stock on the list of any prominence that did not score a considerable advance. This was the more significant as the bank statement proved decidedly disappointing, the Kansas State crop report showed a greater deterioration for the month of May than had been expected and the weather and crop news generally was not of a favorable

Early in the week the market began to give indications of having become thoroughly liquidated, and about the middle of the period it manifested a distinctly hardening tendency, which it has maintained down to the close of to-day's business. This it has done in spite of heavy gold exports, which for the week have aggregated \$7,100,000, and of weather conditions which, while not as unfavorable as those prevailing earlier, were nevertheless not of a kind to repair the damage suffered by the crops during the month of May. The topic of most general Wall Street interest during the week was the attitude of the Administration toward Mr. Harriman and his roads. and while at first Wall Street was unwilling to believe that there could be any compromise, in view of the conditions brought to light last winter, it has since been forced to change this view on account of the vacilloting and indecisive policy which seems to have recently prevailed. In the wheat market prices have fluctuated without any decided tendency, but cotton has been active and strong all through the week, until the July option has now reached a higher level than at the same time in any previous year since 1876. The underlying argument which the bulls on the staple have used in advancing prices is that while the condition of 701/2 shown in the Government report did not promise a large crop the promise is still less satisfactory on Am BSug.... 13 account of damage sustained since that estimate was made. Reports in regard to the progress of the grain crops have been of the most contradictory character, but as a rule they tended to show that the condition at the beginning of June was lower than at the beginning of the month preceding. The most significant of all was that issued by the Kansas State Bureau of Agriculture to-day, which showed a condition of winter wheat as low as 56, in comparison | Am Loco pf.. 102 with a condition of 84 a month ago. In Wall Street not a great deal of reliance Am MaltCrp. — is placed upon the reports from the Am MCrppf. 22% individual States, the general disposition Am Smelt's. 11934 NY Central. 1124 being to regard the figures issued by Am Smelt pf. 10534 106 NY C& St L... 3834 being to regard the figures issued by Am Smelt pf. 105% the Government for the country at large as far more reliable than those Am Steel Fd. 614

SUB-TREASURY STATEMENT.

THE GRAIN MARKETS.

Prices Rally After an Easier Opening -Bullish Kansas Report-Shorts Cover.

Wheat closed at an advance owing mainly to a bullish Kansas State report and covering of shorts. Early in the day the market was irregular though the changes were not very marked. Many were evening up before the Government report, which is expected on Monday. In the main the tone was easier at first owing to generally favorable weather. scattered liquidation and easier Liverpool

Showers occurred in most States and temperatures everywhere were higher. Reports regarding the spring wheat crop were generally favorable. Minneapolis sent tearish advices on the crop outlook. Moreover, the Northwest sent selling orders, the cash trade continued quiet and there was more or less short selling.

Later on came an upturn, however. Many shorts covered, fearing a bullish Government statement. Then, too, the Kansas condi-tion was officially stated at 56 per cent. This was better than some had expected in view of the rumors in circulation on Friday. It was clearly bullish, however, as 21 per cent. of the area has been ploughed up. This was taken to indicate a crop of about only 50,000,000 bush, for the State. The condition last month was 84 and last year it was 70, with a yield of 93,000,000 bush.

Moreover, many bullish private reports

were received from the Southwest. There was no rain in Kansas. The Southwest sent buying orders and commission houses bought. The Government report, needless to say, is awaited with great interest in the trade. It is believed that it will have much to do with the course of the market in the immediate

the course of the market in the immediate future.

The Michigan State report showed a decline of 4 per cent. in the condition within a month. The secretary of the Grain Dealers Association of Texas estimates the wheat crop of that State at 10 per cent. of last year. Liverpool declined \(\frac{1}{2} \) d. to \(\frac{1}{2} \) d. on further heavy arrivals off coast and the bearish \(Modern \) Miller report. Paris was unchanged to \(\frac{1}{2} \) c. lower. Berlin declined \(\frac{1}{2} \) d. to \(\frac{1}{2} \) marks. Budapest was closed. Broomhall estimates the world's shipments at 12,000,000 bush. against \(12,034,000 \) last week and \(9,220,000 \) last year. He says the weather in southeastern Russia is now favorable for the crops. The Minneapolis \(Market \) Record \(8ays \). "Grain crops in the Northwest made splendid progress during last week. The weather was warm and sunny most of the time, and owing to the fact that the ground was well supplied with moisture vegetation of all kinds is remarkably fast. Reports generally agree that grains, and wheat especially, are strongly rooted, due to the cool weather and good condition of the ground for germination. Another week of such weather as that of last week would go far toward overcoming the bad effects caused by the abnormaly cold and backward spring.

Prediction June 8: Illinois and Indiana, generally fair in north, probable showers in south portions to-night and Sunday; Missouri and Kansas, probably showers to-night and Sunday; with possibly showers to-night and Sunday; with possibly showers in west; North and South Dakota and Nebraska, probably sh wers to-night and Sunday; with possibly showers in west; North and South Dakota and Nebraska, probably sh wers to-night and Sunday; with possibly showers in west; North and South Dakota and Nebraska, probably sh wers to-night and Sunday; with possibly showers in west; North and South Dakota and Nebraska, probably sh wers to-night and Sunday; with possibly showers in west; North and complaints of too much The Michigan State report showed a de-

July Advances Sharply, Then Reacts-Moderate Rise in Later Months-Weather Fair, but Showers and Cooler Pro-July again took-the bit in its teeth and ran

up \$1.50 a bale further early in the day, and though much of the improvement was lost before the close, yet the developments were not of a kind calculated to inspire confidence in a bear. Rumors that a large amount of the lose, stock will be appeared to Europe the local stock will be exported to Europe were again in circulation and were not without their effect. Spot interests and local and Southern shorts were buying. A moderate advance took place in the next crop months, owing to the rise in July, local, Wall Street and Southern buying, covering of shorts and unfavorable crop reports from most sections. Rather more cheerful accounts came to hand from here and there in the belt, but the great bulk of the crop reports were still the reverse of favorable. The weather map was again about all that could be desired. showing fair and warm conditions every-where, and at one time prices reacted. The

was again about all that could be desired, showing fair and warm conditions everywhere, and at one time prices reacted. The setback, however, was only temporary. The prediction was for showers and cooler weather for most States, and this together with covering by nervous shorts imparted a stronger tone to the market later on. Expectations of a builish report by the New Orleans Times-Democrat on Monday also had a bracing effect.

T. A. McIntyre & Co. said: "As the situation stands to-day there is no doubt the market will continue an attractive field for speculation and bull manipulation, and until the weather conditions become more settled and the outlook more reassuring the chances are against price reactions goins far or proving more than temporary. Upon the present time the big speculation has been in the next crop months, but now that the crop scare has become general manipulation by the bull cliques in the old crop options is likely to be more extensive and prices for the July. August and September deliveries may be forced to premiums on these operations, competing with the necessities of exporters who have oversold themselves and the requirements of spinners in fulfilling their contracts before the next crop is ready to come on the market. The average operator will do well, however, to observe caution against over trading, for in the present feverish speculative condition of the market fluctuations are likely to continue so violent and cover so wide a range up and down the scale as to require more than double the usual margins.

Messrs, Norden, Craig, McIntyre, Hutton and Carpenter were buyers, Messrs, Hutton, Dick, Bache and Hubbard sold.

Browning & Co. said: "As the season advances the indications of a very active cotton market during the entire summer become more convincing. Every sign points to frequent fluctuations with a general upward movement. Could a crop of 12,000,000 bales here contingencies must occur. First, favorable weather from now to the end of the cotton growing season; second the absenc
